

SkyView Security Check-up for IBM i & i5/OS

- A subscriber-based service for identifying security vulnerabilities on your IBM i and i5/OS systems. Based on the expertise and experience from an industry-recognized 3rd party expert, SkyView Security Check-up satisfies vulnerability scanning requirements found in most laws, standards and regulations.

The Payment Card Industry, Sarbanes Oxley, HIPAA, GLBA and many new laws and regulations governing data privacy and security require regular testing of your computing environment to identify vulnerabilities. At SkyView Partners our security check-up is all about an unbiased and thorough appraisal of an organization's IBM i or i5/OS security configuration based on a true expert's point of view*. The end result is a set of deliverables that includes:

- A comparison of appropriate results to security best practices, including a micro-level analysis of:

- o System values
- o User profiles
- o Object authorities
- o Application security models
- o TCP/IP configuration
- o And many other considerations.
(over 100 risk areas are reviewed)

- A written summary entitled: "Detailed Observations and Recommendations" featuring a prioritized list of top security issues, including an explanation of why the issues have security implications.

- A customized executive summary identifying the top security issues that is suitable for distribution to your management group and auditors

How it works:

Step 1: SkyView Risk Assessor data gathering product is installed on each system to be analyzed, utilizing the subscriber license that comes with SkyView Security Check-up.

Step 2: SkyView Risk Assessor is scheduled to run and automatically gathers the critical security data for analysis.

Step 3: Organization's system administration group gathers and emails information to SkyView security team for analysis.

Step 4: SkyView's Security Experts* analyze the data produced.

Step 5: One of our security experts reviews all documentation produced for thoroughness and accuracy.

Step 6: A Conference call is scheduled, with a SkyView Security Expert*, to present and review results.

The Details:

- Security Check-up subscriptions are sold on an Annual basis, and are priced per LPAR.
- Subscriber license for Risk Assessor is included and is renewable with or without the service.
- Price varies based on the number of check-ups performed per year. Please call for pricing.

*SkyView Security Experts are trained and managed by Carol Woodbury who is the former IBM iSeries Security Architect and Chief Engineering Manager, author of "IBM i & i5/OS Security & Compliance: A Practical Guide", award winning speaker on the topic of security and she is the Co-founder and President of SkyView Partners Inc. Our staff understand IBM i security practices from Carol Woodbury's point of view, and represent some of the best security resources in our market.
